BUILT WITH PASSION:

All Trisled racing vehicles are built at our factory on the Mornington Peninsula by people that race HPVs: New models are tested by our racing team for 6-12 months before we release them to ensure reliability, durability and performance.

IMPORTANT INFORMATION:

Formula Trisled is available in both primary and secondary school sizes. Please specify your preferred size when ordering. Formula Trisled is a racing HPV and is not suitable for road use. Scrutineering requirements for this vehicle differ between races and are subject to change. While Trisled makes every effort to ensure that our racing models are compliant with Australian HPV racing regulations, we cannot guarantee that our machines will meet scrutineering requirements.

Formula Trisled is a dependable entry-level racing HPV that gives schools some involvement in the building process through the assembly of a replaceable corflute fairing.

Easy-to-ride and maintain, Formula Trisled is great way to get your team into racing at a competitive level.

The fairing kit includes a PowerPoint presentation for use as an instructional and educational aid. The kit is fully recyclable and can be purchased separately.

Formula Trisled's alloy seat enables teams to construct simple seat pads to accommodate different rider heights.

The seat has the added advantage of protecting the steering geometry from wayward feet during fast entries and exits from the vehicle.
