BUILT WITH PASSION:

Utility Quad is built at our factory on the Mornington Peninsula. You can rest easy knowing that this high-quality Australian-made product won't let you or your clients down.

Trisled's practical Utility Quad is suited to a wide range of load carrying applications.

The recumbent quad position is ideal for carrying large loads, giving this machine an efficient and stable riding position.

With a track width of under one meter, this vehicle is still capable of maneuvering in and out of tight spaces and navigating city streets.

The Utility Quad can support a range of activities and environments, such as farming, gardening, spark free factories, public events, disability services, and eye-catching transport for special events and campaigns.

In fact, our Utility Quad can assist anywhere where a low impact approach to moving cargo is required.
